

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1, 4 and 6 in accordance with the following:

1. (Currently Amended) A roulette driving apparatus used with a roulette-type disc changeable player rotating a roulette with a gear provided thereon and where a plurality of discs are loaded, comprising:

a motor having a rotation shaft;

a worm gear installed on the rotation shaft of the motor; and

a driving gear rotating while geared directly to both the worm gear and the gear provided on the roulette, transmitting power generated from the motor to the roulette,

wherein the gear provided on the roulette is provided on a bottom surface of the roulette.

2. (Original) The roulette driving apparatus according to claim 1, further comprising:

a recording and/or reproducing unit;

wherein once one of the discs is selected, said roulette rotates to position said selected disc on said recording and/or reproducing unit.

3. (Previously Presented) A roulette-type disc changeable player including a roulette with a gear provided thereon and where a plurality of discs are loaded and a roulette driving apparatus rotating the roulette, wherein the roulette driving apparatus comprises:

a motor;

a worm gear installed on the rotation shaft of the motor; and

a driving gear rotating while geared directly to both the worm gear and the gear provided on the roulette, transmitting power generated from the motor to the roulette.

4. (Currently Amended) A method of driving a roulette used with a roulette-type disc changeable player having a roulette with a gear provided thereon, the method comprising:

transmitting power from a motor by directly applying a force from a worm gear installed on a rotation shaft of the motor to a drive gear directly engaged with both the worm gear and the gear provided on the roulette, and

wherein the gear provided on the roulette is provided on a bottom surface of the roulette.

5. (Original) The method according to claim 4, further comprising:

selecting a disc; and

rotating said disc to a position on a recording and/or reproducing unit.

6. (Currently Amended) A roulette-type disc changeable player having a roulette driving apparatus to rotationally drive a roulette to read/record signals from one of a plurality of discs loaded on the roulette, the apparatus comprising:

a motor;

a worm gear driven by the motor; and

a driving gear to transmit power generated from the motor to the roulette, wherein the driving gear rotates while directly engaged with both the worm gear and the gear provided on the roulette,

wherein the gear provided on the roulette is provided on a bottom surface of the roulette.

7. (Previously Presented) The roulette-type disc changeable player according to claim 6, further comprising:

a recording and/or reproducing unit, wherein the roulette rotationally positions a selected disc from the plurality of discs loaded in the roulette on the recording and/or reproducing unit.
